Please find below and/or attached an Office communication concerning this application or proceeding.

The time period for reply, if any, is set in the attached communication.

Office Action Summary	Application No. 10/562,698	Applicant(s) LEE ET AL.	
	Examiner Peter G. O'Sullivan	Art Unit 1621	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Claims 15-29 are pending in this application which should be reviewed for errors. In response to the restriction requirement, applicants elect compounds wherein A is an amide group, with traverse. Upon reconsideration, the restriction requirement is withdrawn. Upon the further requirement for the election of a single disclosed species, applicants elected N-(4-tert-butylbenzyl)-2-[3-fluoro-4]methylsulfonylamino) phenyl]propionamide. Accordingly, claims 18-21 are withdrawn from consideration.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Claims 15-17 and 22-29 are rejected under 35 U.S.C. 103(a) as being unpatentable over Suh et al., WO 2002/016318. Suh et al. disclose modulators of vanilloid receptors useful for the treatment of pain, asthma, etc. given by their formula I, s. page 2, left column. X may be O, Y may be a single bond, R represents optionally

methansulfonylamino substituted phenylalkyl and R 2 may be R8-(CH₂)_n-. Applicants' attention is drawn to extremely close examples 193 and 168 which differ from applicants' compounds by a methylene group. It would have been prima facie obvious at the time the invention was made to one of ordinary skill in the art to start with the teaching of Suh et al., to make generically disclosed compounds overlapping applicants especially in view of close compounds already made and to expect them to be useful in the treatment of pain, asthma, etc. Suh et al. has a publication date of 28 February 2002.

No claim is allowed.
